Stratus

COMPANY OVERVIEW

For more than 40 years, Stratus has provided high-availability, fault-tolerant computing to Fortune 500 companies and small-to-medium-sized businesses. Stratus zero-touch computing enables customers to securely and remotely run mission-critical applications without downtime at the data center and edge, turning data into actionable intelligence.
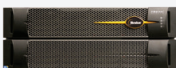

OUR PRODUCT LINES

Stratus ztC Endurance™

Stratus ztC Endurance is Stratus' new generation of computing platforms that deliver 99.99999% uptime using intelligent, predictive fault tolerance to support next-generation, sustainable operations.

Stratus ftServer®

Stratus ftServer is a fault tolerant computing platform uniquely engineered to run mission-critical applications in the data center, control room, or edge location without downtime or data loss.

Stratus ztC Edge™

Stratus ztC Edge is a zero- touch, secure, and highly automated Edge Computing platform, offering built-in application virtualization and fault tolerance in an easy- to-install, ruggedized design.

Stratus everRun®

Stratus everRun is a highly versatile, continuously available software solution that quickly and easily protects your virtualized workloads and data.

Stratus V Series

Stratus V Series systems offer unmatched availability, performance, and scalability for the most demanding high-volume transaction processing applications.
